

SMART SOCIAL MEDIA NETWORKING

(This card is used to facilitate instruction, questions to ask – answers ETC... If the back is required – that’s OK – but try to limit to one card for reference)

What is Smart Social Media Networking?

- Smart Social Media Networking is using safe and precautionary measures while using social media sites.

How can I protect myself while using social media?

- Be cautious when accepting friend requests and interacting with people online. You should never accept a friend request from someone you do not know.

- Don't share information that you don't want to become public. Be careful about what you post about yourself on social media platforms. Once you put something out there, you can't control where it goes. Someone might target you based simply because you work in the DoD. Be cautious when listing your job, military organization, education and contact information.

- Providing too much information in your profile can leave you exposed to people who want to steal your identity or steal sensitive operational information.

- Most important do not violate Operational Security that may affect the Army and your unit's mission.
