

# The OPSEC Two-Step:

Our adversaries are always looking to collect our sensitive information. You can stop them by doing the OPSEC Two-Step:

1. **KNOW** what information you should protect (personal information, work itineraries, family schedules, deployment information, limitations).
2. **PROTECT** that information by not posting it on social networking sites, not discussing it in public locations, or not discarding personal information without shredding it.

## 1. Know It.

## 2. Protect It.

Stay in tune with the beat and do your part to protect critical and sensitive information.
